## Publication Release

October 31, 2006

### MAP SHEET 57

## SIMPLIFIED GEOLOGIC MAP OF CALIFORNIA

Scale 1:2,250,000

This full color 20" x 23" map shows the generalized geology of California. Sedimentary, metamorphic, and igneous rock types are subdivided by geologic age and composition into eleven rock units. Also shown are the locations of major faults within the State and a smaller inset relief map showing the natural geomorphic provinces. This map is suitable for audiences of all ages, and will be of great interest to K-12 educators and students.

Flat in envelope.....\$4.00

Rolled in tube.....\$4.00
